A.D. 1875, 3rd AUGUST. N° 2729.

Magnetic Apparatus.

LETTERS PATENT to Charles Edgar Wetton, of Field House, Harrow, in the County of Middlesex, for the Invention of "IMPROVEMENTS IN MAGNETIC APPARATUS AND ITS APPLICATION TO VARIOUS PURPOSES."

Sealed the 1st February 1876, and dated the 3rd August 1875.

PROVISIONAL SPECIFICATION left by the said Charles Edgar Wetton at the Office of the Commissioners of Patents, with his Petition, on the 3rd August 1875.

I, CHARLES EDGAR WETTON, of Field House, Harrow, in the County of Middlesex, do hereby declare the nature of the said Invention for "IMPROVEMENTS IN MAGNETIC APPARATUS AND ITS APPLICATION TO VARIOUS PURPOSES," to be as follows:—

My Invention has for its object a means of increasing the magnetic action in magnetic appliances, and consists in adapting and applying thereto a disc of zinc and another disc of silver, connected by means of a wire of copper or other suitable conducting material, thereby producing an united magnetic and electric action. And my Invention also consists

600/10

in arranging and fitting the magnets in such a manner that when applied to the human body or the bodies of animals they are covered externally by a layer or layers of cork, india-rubber, gutta percha, silk, or other suitable non-conducting material or combination of such materials, thereby producing increased magnetic and electric action, and also preventing the escape of heat, electricity, or magnetism from the body.

When the said magnets are applied to the bodies of animals, tarpaulin, prepared canvas, or other economical material may be used as the external covering for the magnets.

SPECIFICATION in pursuance of the conditions of the Letters Patent, filed by the said Charles Edgar Wetton in the Great Seal Patent Office on the 3rd February 1876.

TO ALL TO WHOM THESE PRESENTS SHALL COME, I, CHARLES EDGAR WETTON, of Field House, Harrow, in the County of Middlesex, send greeting.

WHEREAS Her most Excellent Majesty Queen Victoria, by Her Letters Patent, bearing date the Third day of August, in the year of our Lord One thousand eight hundred and seventy-five, in the thirty-ninth year of Her reign, did, for Herself, Her heirs and successors, give and grant unto me, the said Charles Edgar Wetton, Her special licence that I, the said Charles Edgar Wetton, my executors, administrators, and assigns, or such others as I, the said Charles Edgar Wetton, my executors, administrators, and assigns, should at any time agree with and no others, from time to time and at all times thereafter during the term therein expressed, should and lawfully might make, use, exercise, and vend, within the United Kingdom of Great Britain and Ireland, the Channel Islands, and Isle of Man, an Invention for "IMPROVEMENTS IN MAGNETIC APPARATUS AND ITS APPLICATION TO VARIOUS PURPOSES," upon the condition (amongst others) that I, the said Charles Edgar Wetton, my executors or administrators, by an instrument in writing under my, or their, or one of their hands and seals, should particularly describe and ascertain the nature of the said Invention, and in what manner the same was to be performed, and cause the same to be filed in the Great Seal Patent Office within six calendar months next and immediately after the date of the said Letters Patent.

Wetton's Improvements in Magnetic Apparatus.

NOW KNOW YE, that I, the said Charles Edgar Wetton, do hereby declare the nature of my said Invention, and in what manner the same is to be performed, to be particularly described and ascertained in and by the following statement (that is to say):—

My Invention of "Improvements in Magnetic Apparatus and its Application to various Purposes" has for its object a means of increasing the magnetic action in magnetic appliances, and consists in arranging and fitting the magnets in such a manner that when applied to the human body or the bodies of animals they are covered externally by a layer or layers of cork, india-rubber, gutta percha, silk, or other suitable non-conducting material or combination of such materials, thereby producing increased magnetic and electric action, and also preventing the escape of heat, electricity, or magnetism, from the said body or bodies.

When the said magnets are applied to the bodies of animals, tarpauling, prepared canvas, or other suitable economical material may be used as the external covering for the magnets.

Having thus described the nature of the said Invention, and in what manner the same is to be performed, I hereby declare that what I claim as of my Invention is, the covering of magnets externally with a layer or layers of cork, india-rubber, gutta percha, silk, or other suitable non-conducting material or combination of such materials, when applied to the human body or to the bodies of animals for the purposes described.

In witness whereof, I, the said Charles Edgar Wetton, have hereunto set my hand and seal, the Second day of February, in the year of our Lord One thousand eight hundred and seventy-six.

C. E. WETTON. (L.S.)

Witness,
M. L. PLAYER,
4, Jersey Place,
Cheltenham.
